

elure Advanced Skin Lightening Technology

Syneron Medical Ltd introduces elure Advanced Skin Lightening technology to treat hyperpigmentation. The elure regimen consists of 3 products: Advanced Facial Wash, Advanced Skin Lightening Lotion, and Advanced Skin Lightening Night Cream. The face and neck are first cleansed with the Advanced Facial Wash. After, the elure Melanozyme from the Advanced Skin Lightening Lotion or Advanced Skin Lightening Night Cream is applied. Then the Activator component is applied to initiate the skin-lightening process, which will be complete in an hour. elure's Melanozyme is a patented version of the naturally occurring enzyme lignin peroxidase. This treatment regimen reduces melanin in the upper layers of the epidermis. It can be used on all skin types. It does not cause irritation or contact dermatitis. elure Advanced Skin Lightening technology is available exclusively through dermatologists, plastic surgeons, aesthetic practitioners, and medical spas but does not require a prescription. For more information, visit www.elureskin.com.

Biologique Recherche Crème Dermo-RL and Sérum T.E.W.L

Biologique Recherche launches Crème Dermo-RL and Sérum T.E.W.L (transepidermal water loss) to rehydrate and recondition skin. Both products target and replenish lipid production. Crème Dermo-RL is formulated to improve the skin's self-defense system by providing moisture and

rebuilding the cutaneous barrier. Sérum T.E.W.L is a protective and repairing serum. It works to prevent epidermal dehydration and lessens the appearance of fine lines due to dehydration. The complementary duo can be used in combination or separately. For more information, visit www.biologique-recherche.com.

Christina Cosmeceuticals in the United States

Israeli-based Christina Cosmeceuticals launches in the United States. The Christina collection includes 7 professional-grade products that address both internal and external causes of skin conditions. Unstress is made with natural ingredients and helps relieve redness, puffiness, and irritation. Forever Young restores the skin's youthful appearance. Wish slows the aging process and repairs damage. Silk lifts and firms skin for immediate results. FluorOxygen+C is formulated to reverse signs of sun damage and hyperpigmentation. Comodex heals damage to oily or blemished skin, and Rose de Mer is a resurfacing peel used to refine texture. Christina also offers companion home care collections to enhance professional treatments and maintain results. For more information, visit www.christina-cosmeceuticals.com.

Coppertone's New Sunscreens

Schering-Plough HealthCare Products, Inc, adds 5 products to its Coppertone product line. Coppertone products protect against the sun's UVA and UVB rays. Coppertone Oil Free Foaming Lotion SPF 75+ sunscreen offers

broad-spectrum protection against UVA and UVB rays. The lightweight foaming technology is designed to absorb quickly and provide waterproof protection. Coppertone Oil Free Foaming Lotion SPF 75+ sunscreen is hypoallergenic, fragrance free, and will not clog pores. The Coppertone Water Babies product line also has been expanded to include Foaming Lotion SPF 75+ sunscreen and Pure & Simple Lotion SPF 50 sunscreen. A new formula for Coppertone's sport category of lotions also is available: Lotion SPF 100+ high-performance sunscreen. Another new product includes Coppertone Tanning Lotion SPF 15 sunscreen. For more information, visit www.coppertone.com.

Glytone Acne 3P Gel

Pierre Fabre Dermo-Cosmétique USA introduces Glytone Acne 3P Gel, a nondrying antiacne treatment with continuous benzoyl peroxide penetration to deliver unparalleled antibacterial efficacy without irritation. The formula contains a low concentration of micronized benzoyl peroxide, which effectively treats acne without overdrying the skin. Glytone Acne 3P Gel also contains polyolprepolymer, which promotes continuous penetration of benzoyl peroxide. A polymeric matrix delivers continuous hydration, and free radical oxidation releases oxygen into pores to impair the growth of *Propionibacterium acnes* bacteria. For more information, visit www.glytone-usa.com.

La Roche-Posay Toleriane Ultra

La Roche-Posay Laboratoire Dermatologique introduces

Toleriane Ultra, a daily moisturizer for ultraintolerant and/or allergy-prone skin that contains 0% of preservatives, parabens/fragrance, alcohol/colorants, or lanolin. The ingredient neurosensine helps reduce signs of skin reactivity immediately upon application. The product also contains La Roche-Posay's soothing anti-oxidant Thermal Spring Water. Continued use of the product can reduce skin sensitivity, providing enhanced tolerance and long-term comfort. For more information, visit www.laroche-posay.us.

Neocutis Lumière Bio-restorative Eye Cream

Neocutis Inc offers Lumière, a revitalizing under eye cream. Lumière targets signs of fatigue and aging by calming puffy under eye circles. The product contains Neocutis' exclusive active ingredient PSP (processed skin cell proteins). Lumière helps minimize darkness as well as the appearance of fine lines and wrinkles. Caffeine alleviates puffiness, bisabolol and glycyrrhizic acid soothe fragile skin, and sodium hyaluronate helps retain moisture. For more information, visit www.neocutis.com.

Neova DNA Damage Control Everyday SPF 43 and Active SPF 45

PhotoMedex, Inc, introduces 2 new sun care products to the Neova brand: DNA Damage Control available in both an everyday and active formula. DNA Damage Control Everyday SPF 43 and Active SPF 45 treat and protect against sun damage. Developed using 2 DNA repair enzymes, both formulas help improve cell metabolism, restore the skin's natural barrier, and regenerate collagen and elastin. DNA Damage Control Active SPF 45 is water resistant. For more information, visit www.photomedex.com.

Revision Skincare Intellishade SPF 45 Matte

Revision Skincare announces the launch of Intellishade SPF 45 Matte. Intellishade is a tinted antiaging moisturizer with innovative pore-minimizing technology. Formulated with palmitoyl tripeptide-5, breakthrough peptides reduce the appearance of fine lines and wrinkles by activating the skin's growth factors for increased collagen production. Other active ingredients include lysophosphatidic acid and

lysolecithin, both pore-minimizing agents. Titanium and zinc help protect against UV rays, while ACS-456 provides skin with an immune protection factor to further prevent UV stress and damage. Additional ingredients include THD ascorbate (a form of vitamin C) to brighten the skin as well as green tea and coenzyme Q10 for antioxidant protection. For more information, visit www.intellishadespf45.com.

Scientific Skin NeckSculpt and EyeSculpt Creams

Scientific Skin NeckSculpt and EyeSculpt creams help restore the youthful appearance of the skin. NeckSculpt diminishes lines and wrinkles on the neck, jawline, and décolleté. It helps lift and redefine the jawline, minimize sun damage, and promote even skin tone. Active ingredients include acmella oleracea extract, glycerin, hyaluronic acid, squalene, and jojoba seed oil. EyeSculpt helps to lift, firm, and tighten skin around the eyes. It also delivers intense hydration. Active ingredients include *Spilanthes acmella* flower extract, squalene, glycerin, and jojoba seed oil. For more information, visit www.scientificskin.com. ■
