LITHOTOMY STIRRUPS FOR PATIENT COMFORT

Frontier Medical Innovations says its new **GStirrup**® is designed to provide patients stable and comfortable foot positioning for extended periods of time during office-based surgical procedures. The **GStirrup** is a pair of cushioned lithotomy boots that attach to examination-table foot rests. Straps secure the patient's feet and legs; weights in the base make it difficult for the patient to lift the boot off the footrest. **GStirrups** fit most footrests and are helpful for patients who have hip or knee replacement, low back pain, arthritis, or neurologic conditions such as multiple sclerosis or Parkinson's disease. ■

PREGNANCY, BIRTH, AND BREASTFEEDING APP

Totally Pregnant, an app for pregnant women and health-care providers, is now partnering with **Lamaze International** to provide access to online parenting classes for pregnancy, childbirth, and early parenting. By using the **Totally Pregnant** app, women can personalize their pregnancy experience and clinicians can connect with their patients. Available for iPhone, iPad, Android, and desktop. ■

PREDICTING IVF SUCCESS

Univfy® offers fertility predictive analytics to help prospective parents understand the probability for the success of in vitro fertilization (IVF) and estimated costs. The **PreIVF**™ calculator helps to decide whether or when to start IVF; the **PredictIVF**™ helps determine if another IVF cycle is the right option. The **IVF Cost Calculator** offers a cost comparison tailored to the patient's IVF success rate. **Your Fertility**™ is an interactive multimedia blog offering educational material. ■

SMOKE EVACUATION PENCIL

The **PlumePen**® **Elite** is an electrosurgical smoke pencil with a compact, ergonomic design that is smaller but offers more flow than competitive smoke pencils, claims **Buffalo Filter**. The adjustable capture port allows for optimum visibility regardless of blade length. The one-piece molded design prevents buttons from sticking and improves grip. The **PlumePen Elite** connects to most surgical plume evacuators and generators. ■

SURGICAL CO₂ LASER

Lumenis designed the **AcuPulse Smart CO₂ Laser with SurgiTouch**™ **Automation System** for tissue ablation during gynecologic surgery to increase speed, precision, and convenience over other electrosurgical devices. Robotic, computer-controlled laser-beam movement provides more precision than hand-held lasers and offers reproducible outcomes. Brief laser-tissue interaction reduces thermal damage. ■

REUSABLE FORNIX FOR LAP HYSTERECTOMY

The **Banyan Colpo-Port Vaginal Fornix Delineator** is a reusable uterine elevator/vaginal fornix delineator for laparoscopic hysterectomy. Inserted vaginally, the distal tip has a canted, beveled cup that fits securely in the vaginal fornix. The Calibrated Uterine Elevator (CUE) passes through the inner diameter of the delineator body, through the cervix, and into the uterine cavity. The CUE can be locked at preset depths to prevent uterine perforation. The device is easy to clean using standard sterilization procedures. ■

PORT-SITE CLOSURE DEVICE

neoClose® **AnchorGuide** facilitates rapid trocar exchange and precise **AutoAnchor** placement to help prevent port-site hernia. The **AnchorGuide** design facilitates the delivery of absorbable **AutoAnchors** through soft tissue during surgery; allows for the **VectorX** method of port approximation for reduced tension at wound sites; and helps desufflate to remove CO₂ at the end of surgery. **AnchorGuide** comes in 8–15 mm and 5–12 mm sizes compatible with 8 mm robotic ports. ■
