Rosacea Care

The three-part Obagi Rosaclear System is a collection of products designed to be used together to combat the redness, acne, and blotchiness associated with rosacea. The gentle cleanser removes bacteria and other residue while soothing the skin. A prescription-only metronidazole topical gel (0.75%) is formulated to help treat the pustules and papules associated with rosacea. Finally, a hydrating complexion corrector protects and moisturizes the skin and reduces the appearance of redness. The products are all non-comedogenic, and they are available through physicians' offices. A non-comedogenic sunblock with SPF 30 that compliments this product line is available separately.

Laser for Lipolysis, Contouring

The AccuSculpt system has received clearance from the Food and Drug Administration for laser lipolysis. This pulsed Nd:YAG laser system has a wavelength of 1,444 nm, which is optimal for heating adipocytes. The highly accurate, minimally invasive laser safely and efficiently emulsifies fat, improves physical contouring and the appearance of skin laxity, and reduces patient bruising and other side effects commonly associated with liposuction and other laser lipolysis treatments. Patients experience reduced postoperative pain, and have little to no downtime after laser-lipolysis treatment. The AccuSculpt system also is indicated for surgical incision, excision, ablation, and coagulation of soft tissue.

Amino Acid Skin Care

Biopelle Inc. introduces three new products to its line of Acidified Filaggrin-based Amino Acid (AFA) products. Acidified amino acid is formulated to help improve skin structure and promote skin hydration. A new AFA Soothing Eye Cream helps reduce the appearance of crow's feet by promoting the skin's moisture balance with the AFA advanced protein complex and caffeine. The AFA Ultra-Rich Moisturizer features panthenol to help the skin retain moisture. The AFA Sheer Oil-Free Moisturizer also contains panthenol, but in a lighter, non-comedogenic formula designed for normal to oily skin.

Mineral-Based Sunblock

The Glytone skin care line now includes a new sunscreen lotion as part of its sun care collection. The Glytone Protect sunscreen lotion is available in SPF 30 and SPF 40. The mineral-based SPF40 sunscreen contains hyaluronic acid, as well as 7.5% octinoxate, 7.5% zinc oxide, and 2% octisalate. The lotion is free of oils, irritants, and PABA. The lightweight formula is designed to be absorbed quickly, and it is suitable for all skin types. The lotion should be applied prior to sun exposure and reapplied every two hours or after swimming or sweating. Ask a physician before using on infants younger than 6 months of age.

Bullous Pemphigoid ELISA Kits

The Food and Drug Administration has cleared the BP180 and BP230 ELISA Kits for the detection of bullous pemphigoid antibodies. Patients with bullous pemphigoid are known to have BP180, BP230, or both antibodies in their serum. The kits have exhibited a combined correlation of more than 90%, compared with traditional immunofluorescence detection of the two antibodies. Each ELISA kit contains a 48-well plate coated with recombinant antigen.

Anti-Wrinkle Day Cream

Wrinkle Arrest, a moisturizing day cream, combines broad spectrum sun protection with an amino acid combination that is designed to help reduce the appearance of fine lines and wrinkles. The cream has an SPF of 18, and it is suitable for dry, oily, or combination skin. The cream's unique DermaScyne blend contains 17 different amino acids to help reduce the signs of skin aging, as well as moisture-binding ingredients to promote the skin's collagen and elastin production. The cream has received the American Academy of Dermatology's Seal of Recognition.

Lash Conditioner

ProCyte Corporation adds to its Neova product line with Advanced Essential Lash, a nonprescription lash conditioner that is hypoallergenic and paraben-free. The conditioner is designed to protect eyelashes from breakage and make them appear darker, fuller, and longer. The formula features a copper peptide complex to stimulate hair follicles and promote the production of collagen and various proteins. The conditioner also includes a combination of botanicals and essential amino acids to help strengthen lashes that are thin and brittle. The product does not contain prostaglandin.

Soothing Plant-Based Serum

Neova R2 Serum soothes chronically red and rosacea-prone skin. The aqueous-based, fragrance-free serum is formulated for all skin types, and contains a blend of natural plant extracts, antioxidants, and peptides. It is lightweight and absorbed quickly, and decreases inflammation, cools skin, and reduces puffiness. Ingredients include extracts of *Camellia sinensis* (green tea), licorice, sea whip, and water lily, as well as butylene glycol, dipeptides, glycerin, and palmitoyl tetrapeptide-3. Suggested price is \$52 for a 1-ounce bottle.

Holistic Skin Care

The GliSODin Skin Nutrients line of skin care supplements is now available in the United States. The "nutricosmetic" oral supplements are formulated to maintain skin health from within and protect it from environmental stressors. One of the featured ingredients, GliSODin, is a bioactive form of the antioxidant enzyme superoxide dismutase. The supplements also can enhance results of cosmetic procedures by promoting skin health and restoration. The product line includes Advanced Daily Formula, Advanced Skin Brightening Formula, Advanced Detoxification Formula, and Advanced Pre/Post Formula. The products are suitable for all skin types.

Cytokinin Skin Care

Senetek PLC introduces the Pyratine-6 line of antiaging skin care products. The products feature plant-derived growth factors (cytokinins) that can help reduce signs of aging by removing debris from skin cells. The product line includes crème, lotion, foaming cleanser, soft crème, and sunscreen. The non-greasy formula is not acidic, but it is hypoallergenic and non-comedogenic. Makeup can be applied immediately after using any of the products. The products also may be used before and after cosmetic dermatology procedures.

Chemical-Free Baby Sunscreen

The AB Skincare line includes AB baby, a chemical-free sunscreen designed especially for children and infants as young as 6 months. The formula contains moisturizing ingredients that absorb quickly to start protecting children's sensitive skin from UVA and UVB rays with an SPF of 30. The sunscreen also contains green tea extract and vitamins A, C, and E for antioxidant properties and enhanced skin protection. The product is nonirritating, and it can be used on the face and body.
