Copper Peptide Lotion

DNA Repair Factor Nourishing Lotion combines a patented copper peptide formula with advanced DNA repair and moisturizing properties to help regenerate skin and reverse signs of damage. The lotion's restorative activity is supported by an amino acid system that combines glycine, proline, and alanine in a form similar to collagen. The lotion is designed to identify and repair indirect DNA damage from free radicals and cell oxidation, as well as direct DNA damage from cyclobutane pyrimidine dimers. The hydrating and correcting formula is suitable for all skin types, but it may be especially helpful for mature and photodamaged skin. The lotion may be applied twice daily, after cleansing the skin in the morning and in the evening.

Effaclar Acne Spot Treatment

La Roche-Posay's Effaclar AI Intensive Acne Spot Treatment is available to reduce stubborn and inflammatory acne in as few as 3 days. The formulation includes a 5.5% concentration of micronized benzoyl peroxide to clear inflammatory acne, as well as 0.4% LHA (lipohydroxy acid), which is a lipophilic derivative of salicylic acid that micro-exfoliates the skin and stimulates cell renewal to help even the skin tone, including residual skin marking. The product is oil free and noncomedogenic, and has been tested on sensitive skin.

Personalized OTC Acne Care

Neutrogena's Skin ID regimen is available to treat and help prevent acne. The three-product, over-the-counter system is offered as an alternative to antibiotics for those who are concerned about building resistance to antibiotic treatments. Customers can complete an online skin evaluation that will direct them to a gel cleanser, an acne treatment, and a moisturizer "personalized" to fit their skin condition. The regimen includes salicylic acid, benzoyl peroxide, and a proprietary Micro-Clear technology to deliver the medication deep into pores; the system retails for about \$40.

Sun Defense Kit for Acne-Prone Skin

Acne patients may be at increased risk for sun sensitivity and skin damage, depending on their treatment regimen. The Avidoxy DK defence kit offers products that provide sun protection for acne sufferers without exacerbating their condition. The kit consists of 100-mg doxycycline tablets (available by prescription only) to help destroy acne-causing bacteria, plus two free products: defence acne wash and defence solare SPF 30. The acne wash contains 2% salicylic acid to promote cleansing and exfoliation, and it is oil-free and alcohol-free. The defence solare SPF is an oil-free, noncomedogenic, moisturizing sunblock that contains antioxidants and zinc oxide to provide broad-spectrum sun protection for acne-prone skin.

Microcyn HydroGel for Wound Tx

Oculus Innovative Services has received an expanded clearance from the Food and Drug Administration to market its Microcyn Skin and Wound HydroGel in prescription and over-the-counter formulations. The product, based on the Microcyn technology, is indicated for managing the debridement of wounds such as leg, pressure, and diabetic ulcers, and postsurgical wounds, first- and second-degree wounds, and grafted and donor sites. In addition to its wound-healing benefits, Microcyn technology is safe, and works to reduce inflammation and rapidly improve antimicrobial activity.

Lumixyl Skin Lightening Cream

Lumixyl is available for improving the appearance of hyperpigmentation, including melasma, sun spots, photodamage, age spots, liver spots, postinflammatory hyperpigmentation, and hyperpigmentation caused by systemic disease or prescription drugs. It is nontoxic, nonirritating, water soluble, and safe for all skin types. Formulated as an over-the-counter cream, Lumixyl is an alternative to hydroquinone, and is the only peptide capable of directly inhibiting tyrosinase, the enzyme responsible for initiating melanin synthesis in skin.

Mineral Makeup Line

The DermaMinerals makeup line is available for improving skin barrier function and minimizing the appearance of wrinkles and fine lines. It contains Archipelago Sea minerals, Dermaxyl peptide, boron nitride, mica-wrapped cotton fibers, and honeysuckle extract. The makeup collection includes foundation, powder (loose and pressed), eye shadow, blush, lipstick, bronzer, and concealer, as well as nine brushes and eye-makeup remover. The products do not contain paraben, and are not tested on animals.

Scar Healing Therapy

Kinerase Scar Healing Therapy is available for improving the appearance, color, roughness, and discomfort of old and new scars. It is a concentrated, nongreasy silicone gel that forms an invisible protective barrier to soften, flatten, and smooth scars and reduce the appearance of scar-related skin discoloration. It also helps to normalize collagen deposition by restoring the barrier function to the skin. The gel contains the emollient cyclopentasiloxane; three silicones that form an occlusive barrier on the skin; and a stable lipophilic form of vitamin C that may promote collagen synthesis, prevent lipid peroxidation, and inhibit tyrosinase activity.

Topical Minimizes Bruising

Bruise Relief is available for eliminating the appearance of bruising and skin discoloration by super hydrating the skin, which helps prevent the pooling of blood and facilitate the reabsorption of blood at bruise sites. It is not an analgesic. The topical skin care product is recommended by physicians and plastic surgeons to reduce bruising that results from injury or minor surgery, as well as the appearance of dark circles and under-eye darkness resulting from stress, lack of sleep, and cosmetic procedures. The product is available in gel and serum formulations that are safe for all ages and all skin types. The product retails for about \$18.

Amino Acid Cleanser

Really Really Clean facial cleanser features a unique combination of 17 amino acids that provide the skin with important nutrients. The formula is designed for deep facial cleansing to remove dirt, makeup, and impurities. In addition, the cleanser helps maintain the natural balance of the skin, with a moisturizing element that protects the skin's surface. The cleanser can be used in the morning and evening to prepare the skin for other daily care or overnight products, and it also can be used in the shower as a total body wash. The cleanser can also serve as a shaving gel that helps to prevent razor burn and bumps.
