

# National HPV vaccination rates among teens according to provider recommendation

**68%** of teens nationally have received at least 1 dose of any HPV vaccine, regardless of provider recommendation for that vaccine

HPV vaccination coverage is

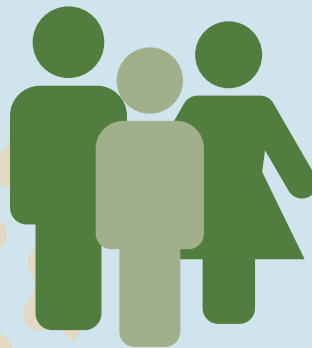

**28% higher**

among teens whose parents received a provider's recommendation

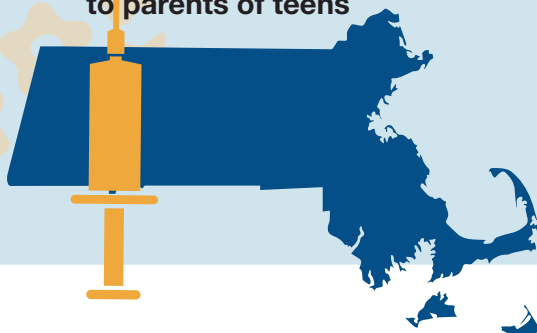

**78%**

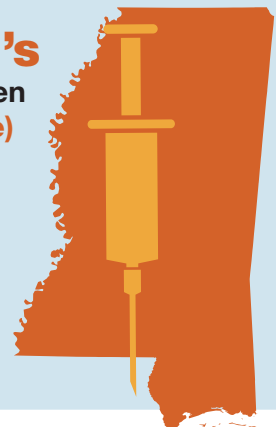

of parents reported that their provider recommended their teen receive the HPV vaccine

**Massachusetts'** providers most often (**91% of the time**) recommend the HPV vaccine to parents of teens

**Mississippi's** providers least often (**60% of the time**) recommend the HPV vaccine to parents of teens

Parental report of provider recommendation among 18,700 adolescents aged 13 to 17. Data from the 2018 National Immunization Survey–Teen.
