

BY WILLIAM D. TAP, MD | Editor-In-Chief

## The Sarcoma Journal enters its second full year with renewed commitment and energy

We begin this second full year publishing *The Sarcoma Journal*—Official Journal of the Sarcoma Foundation of America™—with renewed energy and dedication to its founding principle of communicating authoritative and comprehensive scientific information on the diagnosis and treatment of sarcomas and sarcoma subtypes.

Despite advances in treatment and management options for our patients, the need still exists for more effective treatment strategies, new treatment paradigms, and improved understanding of disease biology. This journal, along with its online platform, plays an important role in the dissemination of reliable,

peer-reviewed content to the sarcoma community and aims to bridge the gap between bench and bedside.

To this end, we have again recruited an outstanding advisory board, many of whom have long-standing affiliations with the Sarcoma Foundation of America. With their help, the editorial staff and I will continue to build the journal and make it the number one academic and practice resource for the sarcoma community.

We invite you and your colleagues to submit original research, review articles, case reports, opinion pieces, and meeting summaries for publication. In this way we will create the robust forum we all desire. **TSJ**

WE INVITE YOU AND YOUR COLLEAGUES TO SUBMIT ORIGINAL RESEARCH, INTERESTING CASE STUDIES, PERSPECTIVE PIECES, AND MORE TO ENSURE THE SARCOMA JOURNAL BEST SERVES OUR COMMUNITY AND PATIENTS AND BECOMES THE ROBUST FORUM WE ALL DESIRE.
